Packing capacity (1 conveyor)

22 packing tables x the productivity of one table (one packer per table); shift = 9 hours. Share of orders measured on September 2026's orders.

Order type	Share of orders	Per table / hour	All tables / hour	All tables / shift
Single SKU (small)	52%	80-100	1,760-2,200	15,840-19,800
Multi SKU (small)	16%	60-80	1,320-1,760	11,880-15,840
Bulky (parcel >= 5 L or 4+ Bango 950 g)	32%	30-40	660-880	5,940-7,920
Blended (real order mix)		50-66	1,100-1,452	9,900-13,068

CBM capacity per object

Object	Standard size	CBM	How it's worked out
Pallet	1.1 x 1.1 m	1.0 m³	Weight limit 1,200 kg. A bigger / smaller pallet spot counts by its floor area.
Shelving	0.6 x 2.1 m	3.78 m³	Floor area x 3 m: the 2 m frame plus about 1 m of cartons stacked on top. Weight limit 350 kg per level.

m² comes from the area highlights (a zone takes the area with its name; overlapping areas count twice). This is a plan in Inventory Planning, separate from the live warehouse layout.
